About the Safety of Jumpions Vinyl

All of Jumpions Inflatable Products are made with Commercial Grade 18oz PVC Vinyl. This vinyl has been tested for lead content and has passed all Federal and State requirements. Federal standards for lead content in vinyl material is 300ppm (particle per million) Jumpions vinyl tested below 70ppm, which is considered virtually "lead free".

In addition, Jumpions vinyl has been certified safe by the SGS Group (www.sgs.com). Established in 1878, SGS is the world's leading inspection, verification, testing and certification company. Recognized as the global benchmark for quality and integrity, SGS employs 59,000 people and operates a network of more than 1,000 offices and laboratories around the world. From textiles to appliances, furniture, food, and electronics, SGS offers a complete range of services to ensure the quality and safety of every single kind of consumer product. Manufacturers worldwide rely on the inspection and testing capabilities of SGS to help them comply with the regulatory requirements governing their products.

Jumpions has always maintained a safety first commitment to quality and has never been involved with any State or Federal investigations in regards to the safety of its products or materials. Jumpions is not an importer or distributor of foreign made products. Jumpions is a manufacturer and builds all of its products in its own factory located in Montebello, CA.

Questions about Jumpions products or materials can be directed to 888-953-1333.
